Fly Control— Without Insecticides

A safe, economic fly control system, ideal for supermarkets, packing houses, food service or any operations that have fly problems. These traps emit light in the ultraviolet range which insects respond to most readily, luring them to the electrified killing grid. All units comply with O.S.H.A., U.S.D.A. and F.D.A. regulations. U.L. approved 115 volt, 60 cycle AC.

Decorative & Effective
