Label Quantity CUSTOMIZABLE

Transformative
weigh price labelling system
### for advanced packaging solutions.

5950145

The GLM-I Weigh Price Labelling System is engineered to deliver high efficiency, modular adaptability, and seamless integration in packaging and processing operations. Building on a legacy of over five generations of successful systems, the GLM-I is designed for unparalleled reliability and operational excellence. Its advanced features include mirror-inverted labelers for frontal access, automatic switching between labelers, and an ergonomic design that simplifies label roll changes and reduces setup time.

Features:
- Efficiency Redefined: Mirror-inverted labelers for frontal access, automatic switching, and ergonomic design reduce setup time and errors.
- Space-Saving Design: Narrow labelers optimize production area, reducing costs.
- Ease of Servicing: Quick-change components and tool-free maintenance minimize downtime.
- Industry 4.0 Integration: Seamless integration with modern software for centralized data management and smart processing.
- Interchangeable Components: Parts of the conveying system are interchangeable with existing models, enhancing compatibility and reducing replacement costs
GLM-Ievo with CleanCut ® applicator

Linerless Labels

5955390

Advanced industrial labelling system with CleanCut® for high efficiency and superior product presentation.

5955390

The GLM-Ievo CleanCut® is an innovative industrial labelling system designed for high-performance weighing and labelling of packaged products. With the ability to label up to 120 packs per minute, it ensures precise and visually appealing labelling even for products requiring a large amount of information. Its modular design allows for easy integration and customization, making it versatile for various applications, including meat, seafood, produce, and bakery products. Economical maintenance is achieved through remote support and easy-to-replace parts, minimizing downtime and reducing total cost of ownership.

Features:
*   Strong performance: High productivity up to 120 ppm—Precise labelling for an appealing product presentation.
*   CleanCut® Linerless Solution: Weighing and labelling technology + CleanCut® Linerless labels + software + global service from a single source.
*   Economic maintenance: Reduced downtime and TCO via remote support, Easy-to-replace wear and tear parts: belts, printhead.

BIZERBA INDUSTRIAL WEIGH / LABELING SYSTEM

PBI Market Equipment Inc.

CWDmaxx

Check Weigher

5950293

High Throughput

5950293

Strong entry model in checkweighing technology.

The CWDmaxx dynamic checkweigher is the ideal solution for efficient, automated, and cost-effective weight control of prepacked products. Handling up to 250 packages per minute with IP54 protection, it is perfect for dry applications. The CWDmaxx offers high performance with a wide range of solutions and options to meet diverse needs

Features:
- High Throughput: handles up to 250 packages per minute.
- Versatile Weighing Range: From 10 grams to 3,000 grams.
- User-Friendly Interface: 12" color touchscreen with alphanumeric, customizable keyboard.
- Robust Construction: Stainless steel version 1.4301 with IP54 protection.

CW-RVA

Check Weigher

Entry Level

5950782

5950782

Bizerba's entry-level checkweigher for efficient and reliable performance.

The CW-RVA dynamic checkweigher is engineered for optimal performance with user-friendly features. Designed for quick and easy installation without the need for a service technician, the CW-RVA ensures consistency in product weight, making it an essential tool for the food and packaging industries. Its simplified interface and modular design enhance operational efficiency and adaptability, providing a high-performance solution that meets stringent quality standards.

Features:
- 12" Color Touchscreen: Enhances usability and interaction, allowing for easy monitoring and adjustments.
- Quick and Easy Installation: Comprehensive guides enable customers to set up and run the machine independently.
- High Throughput: Capable of processing up to 150 packages per minute, ensuring efficient production flow.
- IP54 Standard Protection: Robust construction with an option to upgrade to IP65, ensuring durability in demanding environments.
- Design: Simple design using standard components for extreme fast delivery times.

GLM-E 50

Weigh Price Label

Entry Level

5950456

5950456

Bizerba's entry-level automatic weigh price labeler, cost efficient and reliable.

The GLM-E 50 weigh price label is engineered with user-friendliness and simplicity in mind. Durable, saltwater resistant aluminium construction combined with quick belt change features ensure ease of use and longevity. A condensed footprint makes the GLM-E 50 perfect for small or start-up businesses.

Features:
- Features:
- 12" Color Touchscreen: ease of use and freely customizable.
- Scale sizes of 400mm and 700mm with a max. weighing range of 15kg.
- A max pack rate of 50 to 70 packs per minute makes the GLM-E 50 ideal for small production runs in commissaries and other businesses .
- Optional reject system gives the system check-weighing function.
- A combination of one top, two top or one top and one bottom printer / applicator makes suitable for most of the applications.

iL Pro/GLP/iS 10/20/25

Precision and efficiency combined in one powerful system.

The GLPmaxx printer, iL Professional 50/150 load receptor, and iS industrial weighing terminal work together to deliver an unparalleled solution for modern industrial applications, ensuring precise weighing and reliable labelling. Combined with a washdown enclosure for the GLP, the GLP / iL Professional combination is the ideal entry in the weigh price labelling market.

5954576

5954576 GLPmaxx Label Printer Features:
- Versatile for various industries
- Network compatible and tool-free maintenance
- Linerless label processing for efficiency

5950569

### 5950569 iL Professional 50 / 150 Load Receptor:
- High-resolution weighing up to 150 kg
- Durable stainless-steel construction
- Washdown – IP69
- Suitable for multiple industrial uses

5951710 iS10 Industrial Weighing Terminal:
- Robust design with IP69 protection for harsh conditions
- Easy operation with large keys and acoustic feedback
- Suitable for numerous applications in various company areas
- Flexible mounting options for table, wall, countertop, or stand
- Lights for over / under weight for fast portioning of product

5951710

PBI Market Equipment Inc.

Metal Detector iMD pro

Meets HACCP Standard

4200463

4200463

Compact and versatile metal detector with high detection sensitivity for food industry applications.

The Bizerba iMD pro is a compact and reliable metal detector for the food industry, designed to detect contaminants like steel and non-ferrous metals in packaged products. It features adjustable height and belt speed for optimal integration into production lines, with easy operation via a 7" touch screen. Available in Single, Multi, and Multi-Simultaneous Frequency options, it meets HACCP, IFS, and BRC standards, ensuring high sensitivity and easy cleaning with its IP65 hygienic design.

Features:
- Variable height adjustment for sensitivity.
- Tool-free belt replacement for easy cleaning.
- Multi-frequency options for diverse applications.

LabelSecure S

Ideal for GFSI inspections

5950577

5950577

Bizerba's innovative vision inspection system for label accuracy and quality assurance.

The LabelSecure S Vision Inspection System revolutionizes packaging solutions by enhancing food safety and quality assurance. Designed for accurate verification of label information, it offers a rapid, non-destructive quality control process, ensuring that labelling is correct and compliant. This system meets automation, performance, and sustainability goals, reducing paper records and packaging waste while boosting operational efficiency.

Features:
- Enhanced Accuracy and Traceability: Provides precise and reliable label inspection, checking label presence and position, reading text (including allergen declarations), and verifying 1D & 2D codes.
- Compact and Efficient Design: Ideal for automating required GFSI (BRCGS, IFS, M&S,SQF etc.) inspections and documentation in small areas with limited budgets, ensuring correct labelling on each package.
- Sustainability-Driven: Digital tracking and automatic quality reports reduce waste by digitizing paper logs.
- Robust Construction: IP65-rated enclosure ensures durability in challenging environments.

Load receptor iL Professional150SPM/SP

Ideal for Hygienically Sensitive Areas

Can Handle up to 150kg

5951507

Hygienic, corrosion-resistant load receptor ideal for food and chemical industries.

The iL Professional 150SPM/SP load receptor is designed for hygienically sensitive areas in the food and chemical industries. Engineered to minimize bacterial contamination, it features an ergonomic design with easy-to-clean surfaces, inclined for optimal drainage. The scale's IP69 protection ensures resistance to aggressive cleaning agents and high-pressure cleaners, making it suitable for hazardous areas classified as zones 1/21 and 2/22. This load receptor can handle weighing ranges up to 150 kg and is perfect for applications requiring precise and hygienic weighing, such as seafood, poultry, and dairy products.

Features:
- IP69 protection for harsh environments.
- Ergonomic, easy-to-clean design.
- Resistant to corrosion and contaminants.
